

3.6.1.1.2 MULTIPLE PRESENCE FACTORS

The factors specified in the Table shall not be applied in conjunction with approximate load distribution factors specified in Articles 4.6.2.2 and 4.6.2.3, except where the lever rule is used or where special requirements for exterior beams in beam-slab bridges, specified in Article 4.6.2.2d, are used

Multiple presence factors are based on the directional ADTT. If directional ADTT percentages are not available, they may be assumed to be 50% of the total ADTT.

Number of Loaded Lanes	MPF for design year ADTT>1000 in one direction	MPF for design year $100 \leq \text{ADTT} \leq 1000$ in one direction	MPF for design year ADTT<100 in one direction
1	1.20	1.14	1.08
2	1.00	0.95	0.90
3	0.85	0.81	0.77
>3	0.65	0.62	0.59
